Focus is on joint learning towards scale-up of differentiated service delivery models (DSDM) in order to improve coverage, quality and efficiency

- Knowledge exchange
- Knowledge co-creation, especially where models, tools, resources are new and/or scarce
- Technical assistance with needs assessments, program design, quality improvement (QI), monitoring and evaluation (M&E), engagement of patients and civil society in differentiated care
## Activities and Resources

Meeting Summary: Differentiated Care for Adults at High Risk of HIV Disease Progression

JULY 24, 2017 | CQUIN

The HIV Coverage, Quality, and Impact Network (CQUIN) held its first meeting focused on differentiated care for patients at high risk of HIV disease progression, one of several of the network’s communities of practice. The three day gathering, held July 17-19 in Harare, brought together nearly 70 participants from all nine CQUIN countries.

Differentiated Care for HIV: A Decision Framework for ART Delivery

JANUARY 1, 2016 | International AIDS Society (IAS)

This Decision Framework focuses on the provision of differentiated ART delivery and more specifically focuses on service models for stable clients. It is aimed at supporting HIV program managers at the national and district level to build models of ART delivery and prioritize the implementation of differentiated ART delivery to address local programmatic challenges.

Differentiated Service Delivery: Innovating for Impact (IAS 2017)

JULY 31, 2017 | CQUIN

View presentations and photos from CQUIN’s satellite session at the 2017 International AIDS Society conference in Paris on Sunday, July 23. Differentiated Service Delivery: Innovating for Impact, was an interactive panel discussion that focused on the latest innovations identified by the network.

A Guide to Monitoring and Evaluation for Collaborative TB/HIV Activities

Adolescent HIV Care and Treatment: A Training Curriculum

ART Distribution Form for Stable Patients
Workshops and Communities of Practice

- Launch meeting held in March set the stage for selection of topics for the communities of practice (M&E of DSD for stable patients, Adolescents, Men, HIV and NCDs).
- Second workshop in July focused on patients at high risk for disease progression (P@HR).
- Community of practice online on the M&E of DSD
  - Virtual meetings online using skype
  - Whatsapp for discussion
- Third workshop is on DSD for adolescents living with HIV this week
  - Focusing on knowledge sharing
  - Resource and tool development
Adolescent DSD Workshop

**Goal:** To launch CQUIN’s adolescent community of practice by convening the nine CQUIN countries to:

**Objectives:**
- Share experiences on the “how” of differentiated service delivery for adolescents living with HIV
- Share resources and existing tools on DSDM for adolescents living with HIV
- Work together to develop tools and frameworks related to DSD for adolescents living with HIV
CQUIN and PATA

• Potential to collaborate to ensure learning from CQUIN is shared widely beyond the network.
• Engage experts in field of pediatrics and adolescents and DSD to foster innovation.
• Work with PATA to engage implementing partners and MOHs to support knowledge sharing on DSD for adolescents.
Thank you
