Dear Nurse Dorothy Akello,
Thank you so much for treating me very well on my first day at the clinic, you even brought me lunch, you treated me you're your own and made me feel like I have a family this side at the clinic.
Namatovu Annet.
Thank you

Dear Nurse Chipo,
You are always there for me even in most despised situations. She stood with me and molded me and she brought me to where I am today through her counseling, guidance and exquisite support. I remember once that she told me that I am someone who is special, who can have a normal life just as other young women do. She told me that HIV is not the worst disease and not to be afraid because it is manageable and can be suppressed if we adhere well. I am where I am today because of her profound counseling. I thank you

Dear Nurse Reiley
Thank you for making me be the woman I am today!
If it was not for you, who taught me to stand up for my rights and make the right decisions, where would I be today.
Struggling to make decisions on my own, oppressed and unnoticed. Today I rise above societal values and norms, I am VICTORIOUS.
Love, Gladys
